CREATE

JAYA RAO

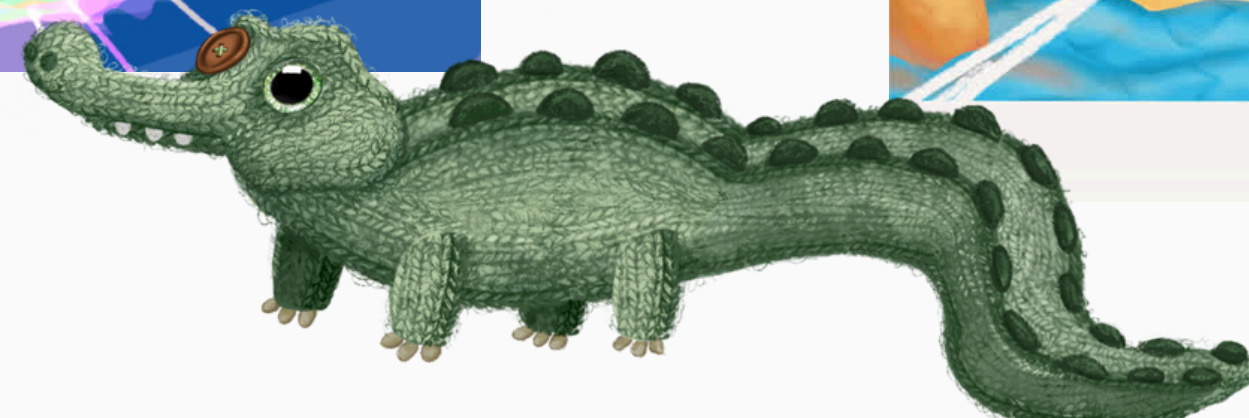

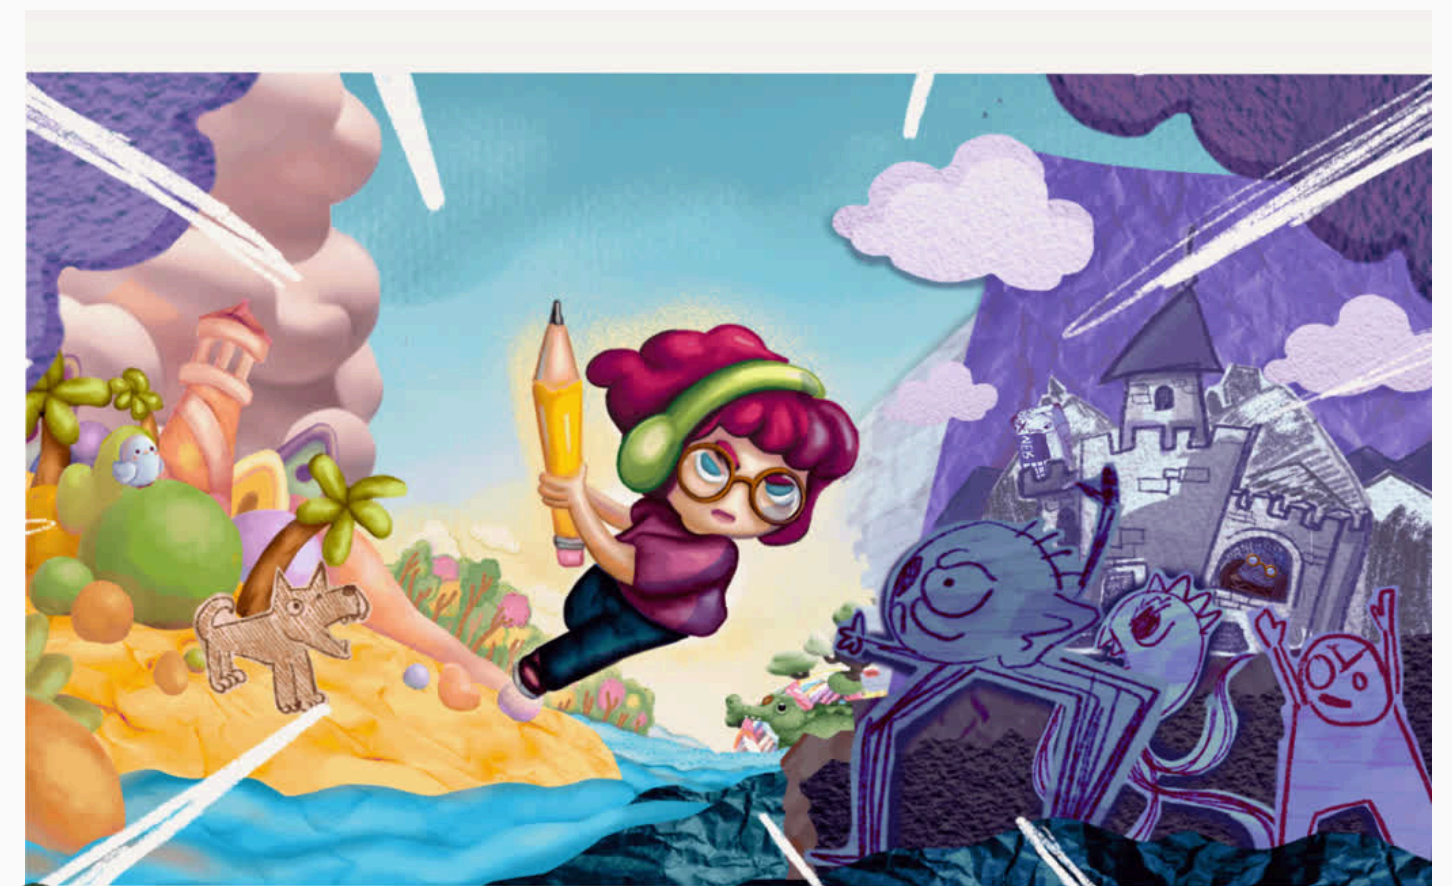

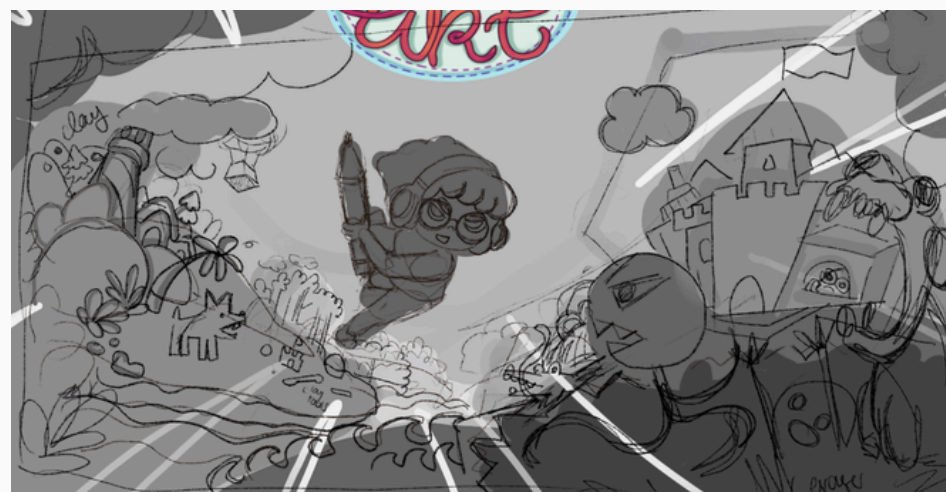

GAME INTRO

MULTIPLE ENVIRONMENTS SHOWN

The main character is shown more colorful here because by the last unlocked environment(eraser kingdom), the characters are allowed more customizing options and have become more “creative”. On the left is Clay Central Creations, and in the far background there are two other environments: felt forest and crochet creek.

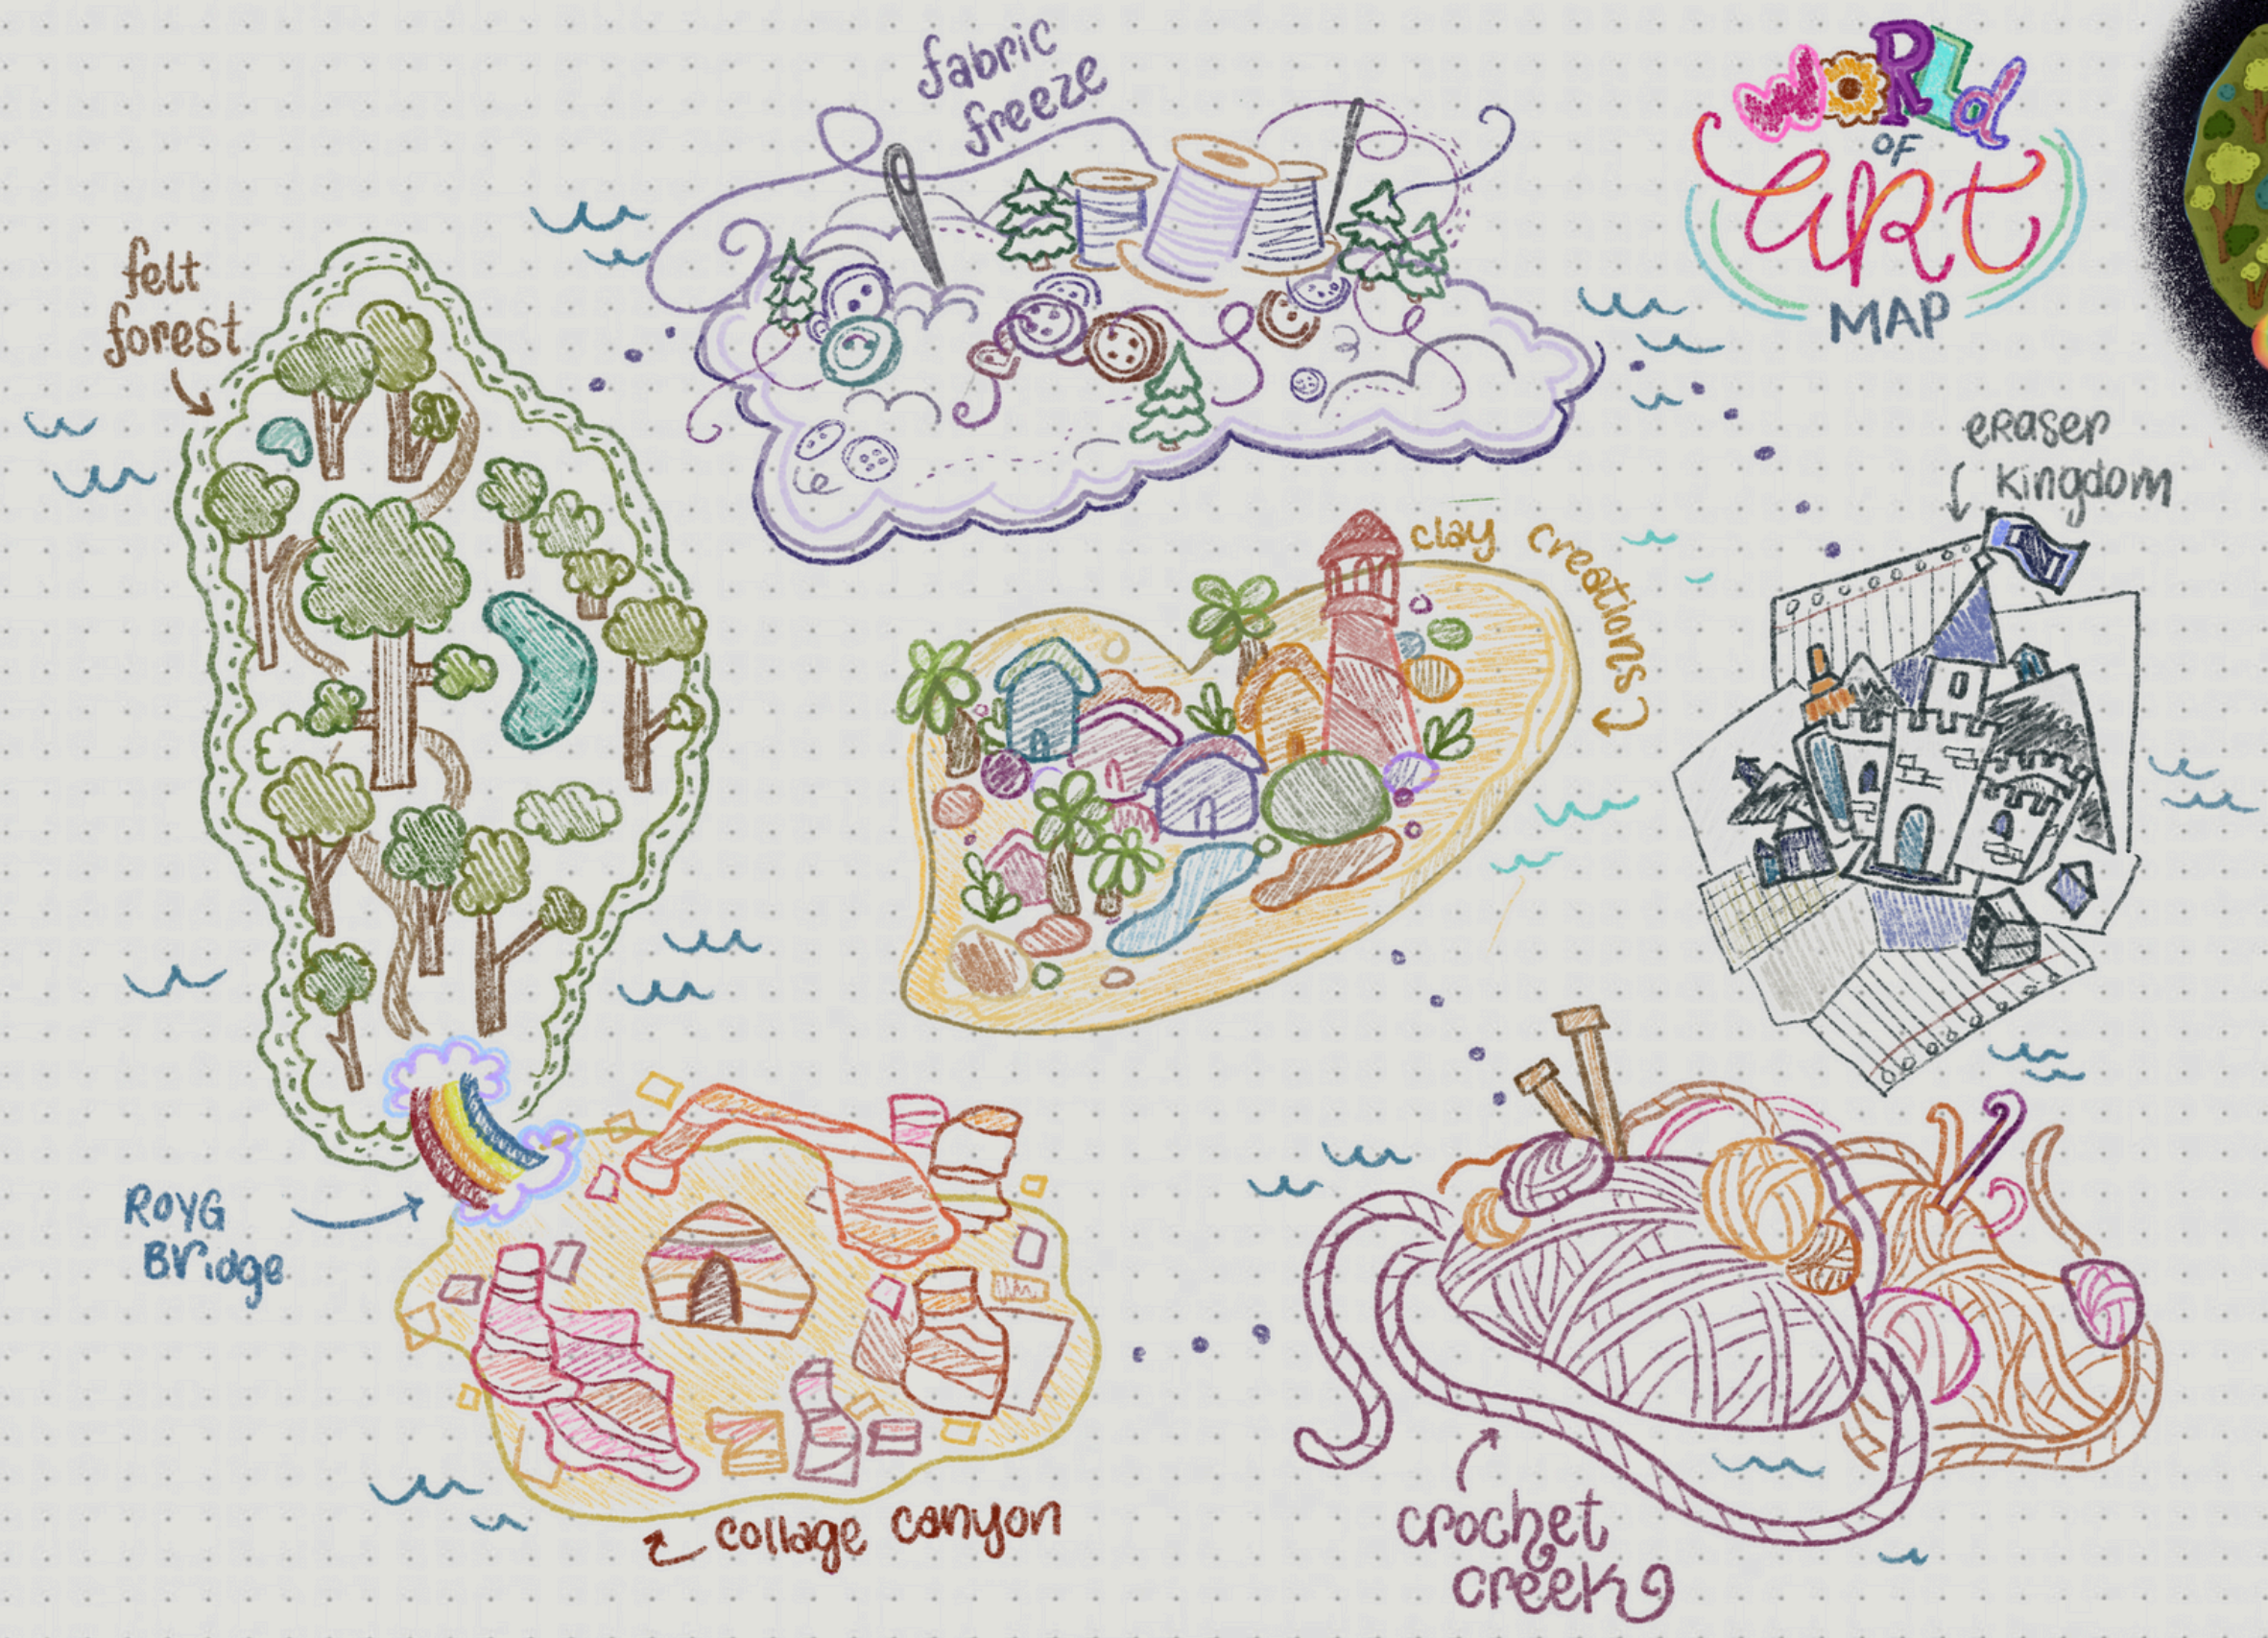

OTHER INTRO COMPOSITION

This image is a composition with one of the choose-your-character defaults sketching in his notebook things coming to life, with characters in the game in the background.

World of Art MAP

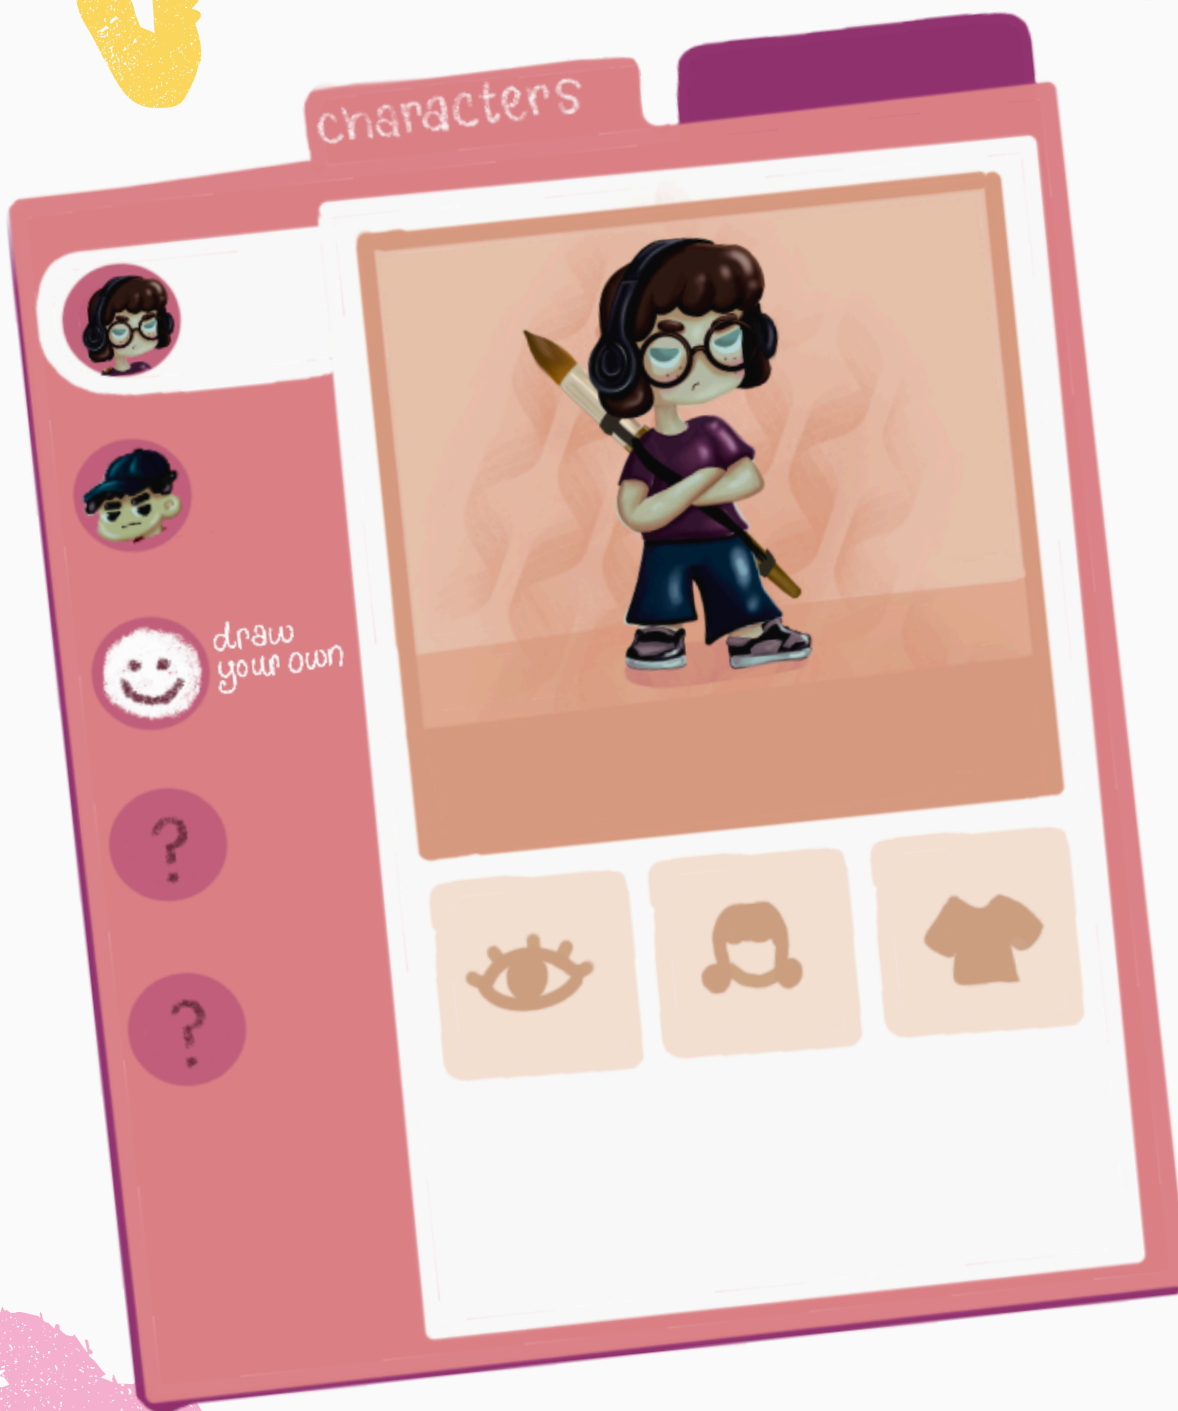

WORLD MAP

Here are two versions of the world. A sketched and simple read of the map, which has the locations labeled and with a dotted path. The second map is a more realistically textured 3D version of the world.

SELECT YOUR character

The characters start off as uncreative and dull. As players progress through the game's artistic challenges, the characters transform with color and creativity and are given more options to customize their own character.

Drawing your own character and pet would be also option.

ENVIRONMENTS

FELT FOREST

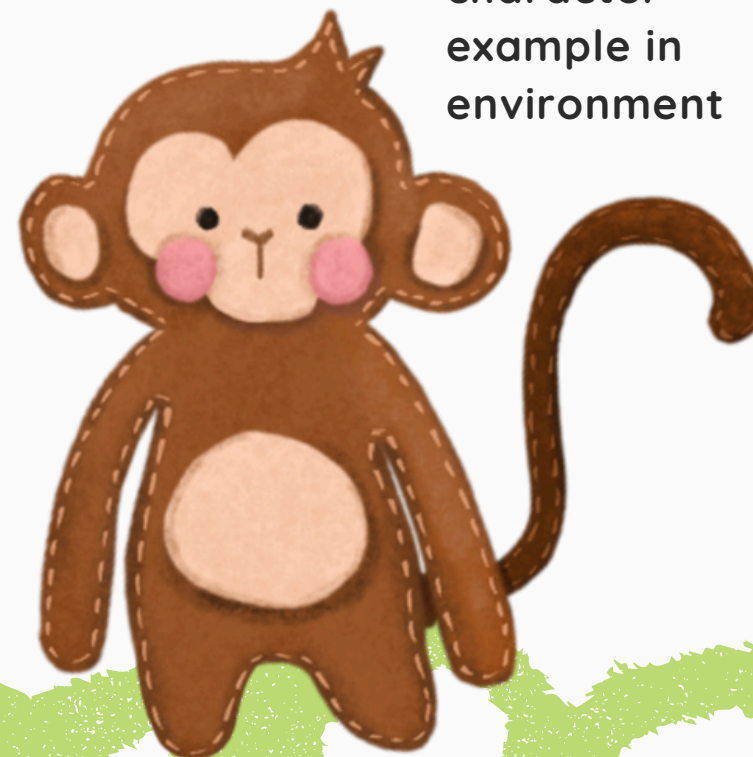

Felt Forest is a colorful, felt-covered world where players use tools like the Exacto Scooto, scissors, and a pencil to solve creative shape challenges. It's a fun, hands-on way to explore figures, forms, and silhouettes while learning the basics of visual design.

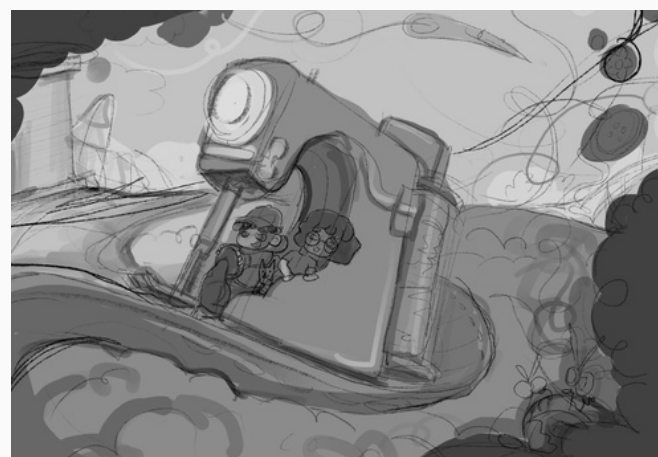

EXACTO SCOOTO

transportation and a cutting tool in felt forest. Would be used for cutting large cut outs like buildings or trees.

ENVIRONMENTS

FABRIC FREEZE

Fabric Freeze is a frozen world of stiff seams and sharp folds. Players race a sewing machine through icy trails, mend patterned patches, and press frozen wrinkles flat. Along the way, they learn symmetry, contrast, line, and negative space, all stitched into fast, tactile challenges.

environment character example

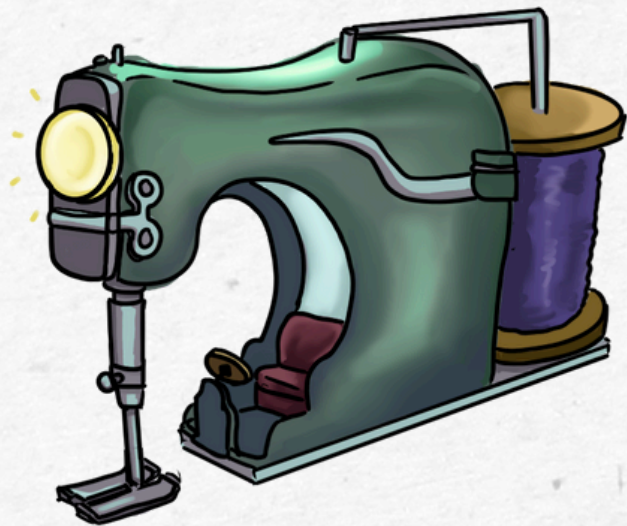

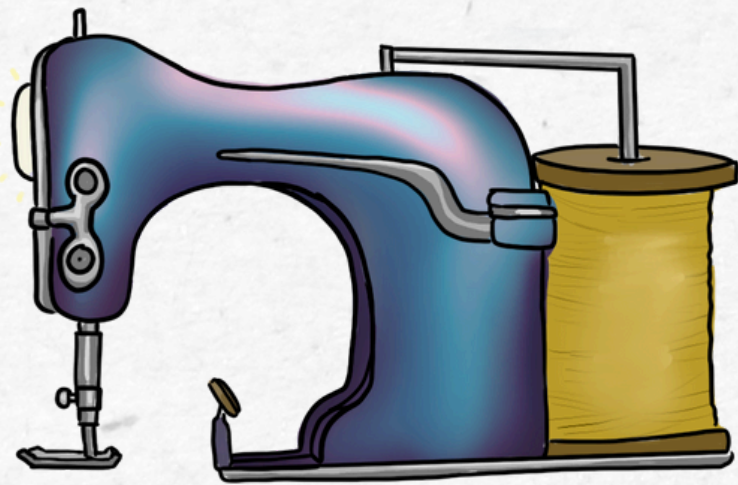

ENVIRONMENTS

CROCHET CREEK

Crochet Creek is a winding, textured landscape stitched from yarn and loops. Players use tools like the Hookshot Needle and Pattern Pad to unravel puzzles and weave their way through lessons on patterns, repetition, and rhythm in design. With every loop and knot, they learn how small details build into bigger visual ideas—all while having fun in a cozy, handcrafted world.
